# PROJECT AND PROGRAM MANAGEMENT

◀ **Thomas J. Meyers**  
CEO PM Technologies

## Project Management Experts: Making an Impact on Your Organization

PM Technologies provides project management expertise to plan, manage, and deliver strategic projects on time and on budget to achieve our client's corporate goals. As experts in project management, we work with information technology, telecommunications, construction, transportation, and professional services organizations to meet project deadlines, assess project management capabilities, and rescue troubled projects to increase profitability. We drive operational efficiencies by applying proven, hands-on project management practices that deliver successful projects and make an impact on your organization.

PM Technologies was founded with the vision of providing project management services that improve business performance in repeatable and measurable ways. As a result, we have developed an extensive portfolio of successful projects for leading corporate clients. Our Project Management Professionals have the proven capability to help your organization navigate through today's business challenges.

# Professionals with a Team Approach

## The PM Technologies Difference

The PM Technologies' "Team Approach" is the cornerstone of our management philosophy. We partner with our clients, taking ownership and accountability for their mission critical projects. As a solution focused company, we care about our client's goals and do what it takes to make their projects successful. Our professionals take the time to get to know our clients and we dedicate ourselves to running their projects like our own. Your success is our success.

Our proven ability to deliver difficult, complex projects is why PM Technologies is trusted by many Fortune 500 companies. We have managed more than \$10 billion in strategic projects by offering customized solutions based on our client's business needs. Our expert management team is actively involved in the leadership of all client engagements. Whether you need a professional project manager, mentorship, or standards and process improvement, PM Technologies has the expertise to meet your needs.

 We partner with our clients taking ownership and accountability for their mission critical projects

## Our Mission

### What We Stand For

Our mission is to provide professionalism and excellence in project management, while creating value, accountability and partnership with our clients.

Our main concern is our clients success and profitability.

We excel at implementing large, complex, mission critical projects with multiple stakeholders.

## Our Client Services

1

### Project and Program Management

Our highly seasoned PMP certified professionals have the extensive project and program management experience required to effectively lead programs of all sizes and complexities. A certified project manager from PM Technologies can be the answer to better decisions, information, and execution.

2

### Portfolio Management

PM Technologies' Project Portfolio Management approach helps you select and manage an optimal portfolio of projects – one that maximizes your organization's responsiveness, revenues, and adaptability while keeping the projects aligned with your strategic business goals and objectives.

3
